

Welcome to JK Dental.

Modern Dentistry is evolving so we specifically designed JK Dentalcare to enable state of the art dental treatment to be carried out in an attractive and welcoming environment. Our philosophy is to help our patients achieve the optimum level of oral health, providing advanced and gentle treatments of the highest standard.

We invest constantly in the latest technology and continuing professional development to maintain our position at the forefront of exciting new treatment options for the benefit of our patients.

Our goal is to help you achieve the feeling of well-being that comes when you know that your smile is radiant, your mouth is healthy and you are fully equipped to keep it that way.

Dr Kenny Mashru & Dr Jat Patel
Clinical Directors

You have chosen the best....

In addition to outstanding clinical treatment, at JK Dentalcare we aim to ensure that your expectations are exceeded on every level. The ambience you will find is stylish, calm, and welcoming. The quality of care and surroundings you can expect will be First Class.

During your visit you will be offered a range of refreshments and during treatment you can listen to relaxing music or watch your favourite dvd on the ceiling mounted LED tvs. Every member of our team will be constantly focused on your needs.

You have made a conscious choice to have the 'Best of the Best'. We are committed to quality and you are our priority. We look forward to welcoming you on your next five star journey at our clinic.

Experience, Dedication, The Best

Relax....

Its probably the initial impression that confirms why JK Dental is a very different practice. A practice that is comfortable, carefully designed to make you feel instantly at home and a warm welcome guaranteed. Simple courtesy is simply essential. We pride ourselves in delivering what others aspire to.

Excellence...

Our standards are set at five star, we will always treat our patients with respect and courtesy and strive to make every visit enjoyable. We will only deliver the best treatment for you which will be personalised and planned. We will listen when you talk. We will do our absolute best to keep time but never compromise the quality of our work.

We will value the important choice you have made, when you chose us

Tooth Whitening

Porcelain Veneers

Smile makeovers

Dental Implants

Invisalign

What we do....

The way you feel about your smile can affect your level of confidence, and the way you conduct yourself. At JK Dentalcare we always repair to the highest standard and use the very best materials and techniques. Your comfort is our priority throughout any procedure. We take time to check for early signs of problems and decide together the best solutions for you. We have flexible payment options should you require.

Then with the future in mind we show you how to look after your teeth. This is a better way of looking at Dentistry and is one of the pillars we rely on at JK Dentalcare.

A Healthy Smile for Life...

Enhancing your Smile

Tooth Whitening

Teeth Naturally darken and discolour with age but staining is made worse by such things as smoking, red wine, tea and coffee. Whitening can be achieved quickly using the latest 'Zoom!' laser whitening system in the clinic, or at home over a longer period using custom- made trays which are worn at night. Sometimes a combination of both techniques is used. This treatment is an ideal way to create a radiant smile and more youthful appearance to naturally boost your self esteem.

Porcelain Crowns/Inlays/Onlays

There is no longer any need to tolerate crowns which don't match your other teeth or dark metal at the gum line. Porcelain crowns, inlays and onlays are metal free, stain-resistant, perfectly colour-matched and completely natural in appearance.

White (tooth coloured) fillings

If part of a tooth has been lost, either through decay or accidental damage, a filling may be required, to stop future discomfort. Composite 'white' fillings match the colour of natural teeth. Many people decide to switch to white fillings when older style amalgams need replacing due to wear and tear. However, if you have dark or discoloured fillings that are visible when smiling or laughing, you may like to change them for aesthetic reasons.

Tooth Contouring

Small Chips, ridges and irregularities can be cleverly disguised by means of a simple, quick procedure that involves bonding a small amount of white filling material onto the tooth.

Bridges

A bridge can be used to fill the space where a tooth is missing: a replacement tooth(or teeth), being fixed to the natural teeth at either side of the gap. We match your bridge to the rest of your teeth to create as natural a result as possible.

Dentures

The latest handcrafted dentures will look like natural teeth and provide you with a confident smile.

Endodontics

Endodontic (root canal) treatment is an excellent way of saving infected or damaged teeth. It can therefore be an important way of saving precious teeth. The pulp inside your tooth contains blood vessels and nerve endings that keep the tooth alive. Endodontic treatment is required when the pulp has become infected through decay or injury. The infection is removed, the inside of the tooth cleaned and a crown placed to complete the treatment.

Oral Hygiene

Effective oral hygiene is vital in order to help keep your teeth and gums in optimum condition, your smile whiter and your breath fresh. At regular hygiene appointments we will remove stains from coffee, tea or cigarettes and show you brushing and flossing techniques to use at home. Encouraging children to look after their teeth from an early age will help establish a healthy routine and minimise the need for dental treatment in the future.

Oral Cancer Screening

We always check your mouth for signs of cancer during a regular dental check-up. Early detection and treatment is critical as it increases the chance of survival, allows for simpler treatment and results in a better quality of life for sufferers.

Invisible Braces

You may have heard about the new 'invisible brace' and wondered what it is all about. If you have teeth that are crowded, too far apart or have shifted since wearing conventional braces, invisalign® may give you a new reason to smile! Because it is nearly invisible almost no one can tell you are wearing invisalign®, so you can smile more during as well as after your treatment. You can remove invisalign® so you can eat and drink what you like, and studies have shown that it can be better for your dental hygiene during treatment. With no metal or sharp edges, invisalign® is comfortable to wear and does not cause allergies. The convenience and ease of use have made it the choice of over half a million people, giving hundreds of thousands of people amazing new smiles.

Facial Aesthetics

We offer professional advice and some of the most advanced rejuvenation treatments available to help soften fine lines, wrinkles or folds to create a more youthful appearance.

Botox®

Botox treatments involves painless injections that relax targeted facial muscles. This reduces the activity of particular muscles in order to prevent lines or wrinkles forming.

Dermal Fillers

Dermal fillers are very popular as they can smooth away wrinkles, lines and folds around the nose and mouth or give your mouth a fuller more sensuous shape. Juvederm® is crystal clear gel form of hyaluronic acid, a substance that occurs naturally in the body. It Hydrates and gives volume to the skin, providing immediate, natural looking results

Promises & Expectations

We PROMISE to

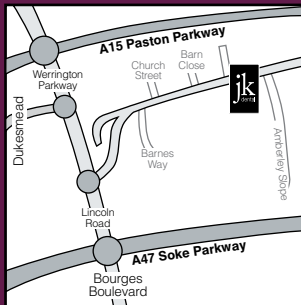

- Listen to your dental concerns and try and give a clear explanation and a variety of solutions using the latest techniques available.
- Inform you of the latest techniques and all the options and always use the best materials available
- Provide high quality, modern dentistry, performed efficiently and as gently as possible.
- Follow the latest cross infection guidelines.
- Provide a written estimate for planned treatment, where treatment is complex and inform you of any change to the original treatment plan as treatment progresses.
- Endeavour to keep to time and , where not possible for any reason, inform you within ten minutes of any likely delay.
- Respond quickly and efficiently to any concerns.

We ASK you to:

- Maintain your oral hygiene when away from the practice.
- Attend appointments promptly and, if you are unable to keep your appointment, give 48 Hours notice to avoid a non- attendance charge
- Pay for treatment when requested, which unless otherwise arranged, will be at the time of your visit.
- Attend regular oral health screenings at the required intervals and care for your dental work, using techniques we have shown you.

Relax...you have chosen the best
